Create video format combinations using ircombine

Published 03/12/2002

Symptom(s):

Create video format combinations using ircombine
Where to find documentation on Ircombine

Fact(s):

IRIX 6.5.X
Silicon Graphics Onyx
Silicon Graphics Onyx2
Video Format Combiner (IRCombine) '/usr/gfx/ircombine'

SGI Solution:

When using the GUI version of ircombine, the best reference to use is "A Video Format Combiner Tutorial" which is Appendix A: of the 'InfiniteReality Video Format Combiner User's Guide.' This guide can be found at:

http://techpubs.sgi.com/library/tpl/cgi-bin/getdoc.cgi?coll=0650&db=bks&srch=&fname=/SGI_Admin/Combiner_UG/sgi_html/apa.html

The man page is helpful but only for using the command line parameters. It will not be of use with the GUI controls. The Video Format Combiner Tutorial will show you how to resize and move the windows, select channels, etc.

See ircombine manpage
